6. Changing the battery

- a. Remove black plastic battery compartment cover (located at the base of the lock cover) by pressing the plastic retaining latch of the cover.
- b. Allow the battery and its attached leads to drop down and out of the battery compartment. If it does not drop, gently pull on the battery holder until it drops out.
- c. Remove the battery holder cover and remove the batteries.
CAUTION! Hold onto the battery terminal to avoid pulling the wires out of the housing.
- d. Replace with 4 x size "AA" (1,5 V) **Alkaline** batteries.
- e. Gently push the battery terminal and the leads completely into the lock housing.
- f. Re-Install the battery cover by placing one side of the cover in position first and then gently pressing the retaining clip into place.
